

**Table 2. Summary of Major Research Areas by Center**

	Berkeley	CAPRA	Chicago	Duke	Hopkins	Michigan	Minnesota	NBER	Syracuse	Texas	U-Penn	UNC	USC	USC/UCLA	Wisconsin		
Biology, Genetics and Demography of Aging	**				**			*							**	**	
Cognitive Aging and the Demography of Dementia				*			**						**		*		
Consequences of U.S. and Global Aging	**				**								*				
Determinants of Health, Well-Being and Longevity	**				**			*			*		**			*	**
Disability, Health Care and Long-Term Care				*			**			*		**			**		
Effects of Interventions on Population Health								*				*					
Health Trends and Disparities	**				**			**			*		**		**	*	**
Population, Economic and Health Forecasting	**				*	*									**		
Other(Longitudinal studies of aging populationsPhysiology, sensory limitations and daily activitiesSocial and economic aspects of agingAging and the life course)																	
Other(Health Care Resource Allocation and ProductivityImplications of Health PolicyThe Value of Medical Research and Innovation)																	
Other(Health and Well Being in Later LifeAging, Genetics and Social ScienceSurvey Measurement and Methods)																	
Other(Global Aging and HealthEarly-life Conditions and Older Adult Health, Behavior and Well-Being)																	
Other(Economics of AgingInnovations in Data Collection and Measurement in Aging ResearchDeterminants of Health and Aging Across Social Species)																	
Other(Behavioral Economics)																	

**Key**
